# About Darts-ip

Darts-ip provides global information and analytics that support IP prosecution and litigation activities. Through our platform, IP professionals gain unparalleled insights into IP rights, companies, jurisdictions, legal topics and market trends.

Darts-ip users can quickly search and track more than 6 million cases covering **trademarks, patents, copyrights, designs & models, domain names and unfair competition.**

A dedicated team of local legal experts, in partnership with cuttingedge AI and machine learning tools, extracts key data points from every case.

Darts-ip's smart tools help **win cases, build strategies and identify new opportunities.**

# Why Darts-ip?

- The largest database for Intellectual Property Cases
- Global coverage
- Administrative and judicial decisions in a single interface
- Sophisticated search tools, such as search by legal topic
- Time savings in finding cases and more accurate results
- Be informed proactively of any newly published information by setting up alerts
- Our data can help you win cases, build strategies and identify new opportunities

---

**Darts-ip adds value  
to all stages of  
trademark, patent and  
others IP domains  
protection, including  
registration, monitoring,  
opposition, examination,  
contestations, cancellation  
and litigation.**

Darts-ip collects, analyses and maintains the world's largest database of IP prosecution and litigation

## Unmatched database of global IP cases

**5.1M+**  
IP Cases

**3.3M+**  
Trademark Cases

**1.7M+**  
Patent Cases

**140+**  
Countries

**3.600+**  
Courts

# Cases by practice area

Trademark

4 194 351 cases

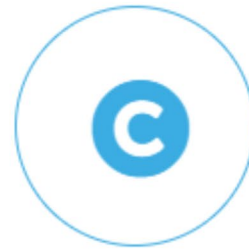

Patent

1 878 221 cases

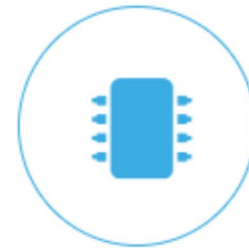

Domain Name

146 272 cases

Copyright

201 864 cases

Design & Model

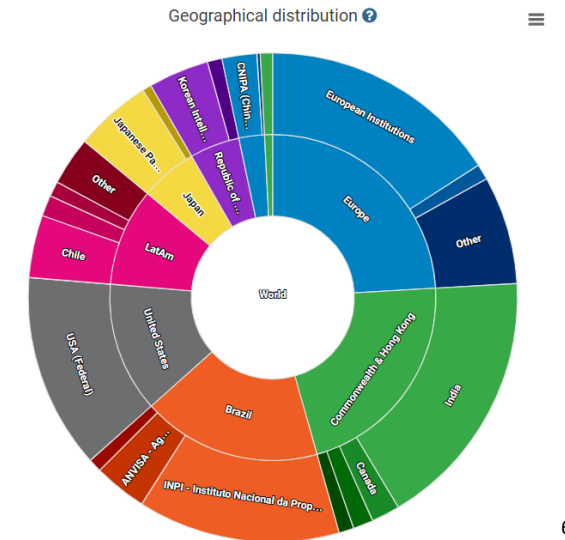

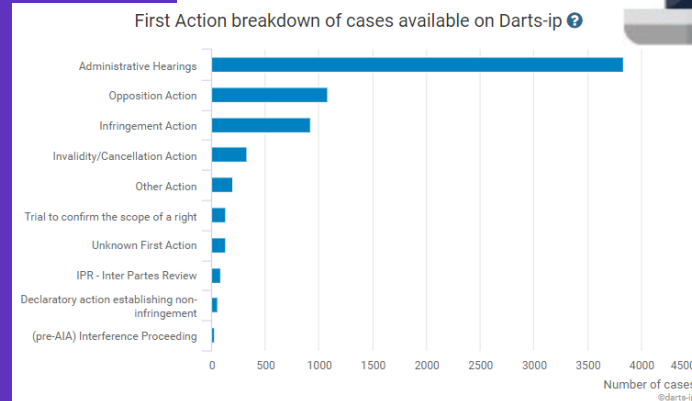

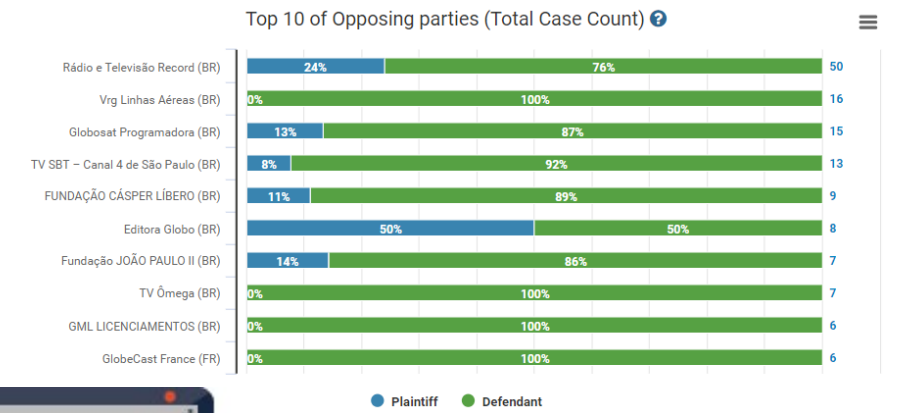

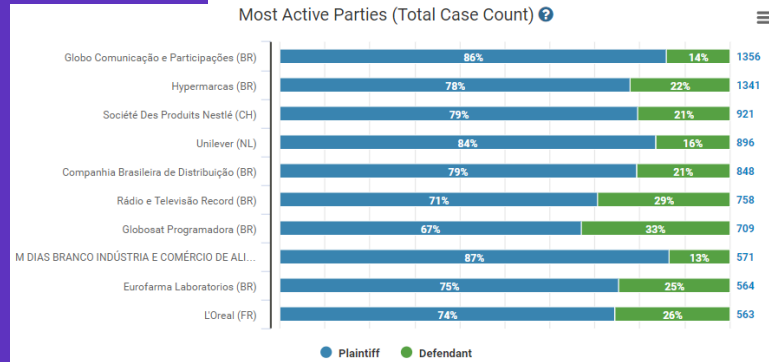

118 925 cases

As intellectual property has become a global matter, Darts-ip data helps users see the full picture by making global IP cases completely accessible.

# Insights

Perform a simple search and access interactive graphs that help you interpret your global search results

Rapidly view and analyse large amounts of case law data at a glance through a clear graphical overview

# TRADEMARKS TOOLS

## GOODS & SERVICES COMPARISON

### Are these Goods & Services similar?

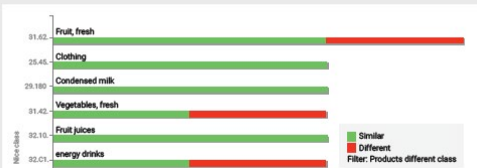

- Your mark in Class 25 for **clothing** was deemed too similar to a mark in Class 14 for **jewelry**
- Use the [Goods & Services Similarity Finder](#) to find decisions where clothing and jewelry have been compared

Previous decisions where "Jewelry" and "Clothing" were different

### What Goods & Services are similar to mine?

- See sample of search results below for "Coffee"

Trademark search interface showing various filters and results. The 'Points of law' filter is highlighted in a red box. Other filters include Verbal, Type, Concept, Goods and services, and Relevant public. The interface also displays search statistics and a search history section.

## TRADEMARK COMPARISON

### VERBAL COMPARISON

#### Are Vertex and Vertox similar?

- Compare the unique verbal structure of two marks
- Generate statistics on likelihood of confusion based on case law

Verbal Comparison tool interface showing two trade marks (Trade mark 1 and Trade mark 2) being compared. The interface includes a grid of characters and symbols for comparison, with a legend for Similar (green) and Different (red).

### TYPE COMPARISON

Search for decisions that have assessed the similarity between two trademarks by comparing their type (word mark, figurative, 3D,...)

### CONCEPT COMPARISON

Search for decisions that have assessed the similarity between two trademarks by comparing their concepts.

## POINTS OF LAW

### How have the courts decided on a specific legal issue?

- Use [Points of Law](#) to find previous decisions related to "descriptiveness"

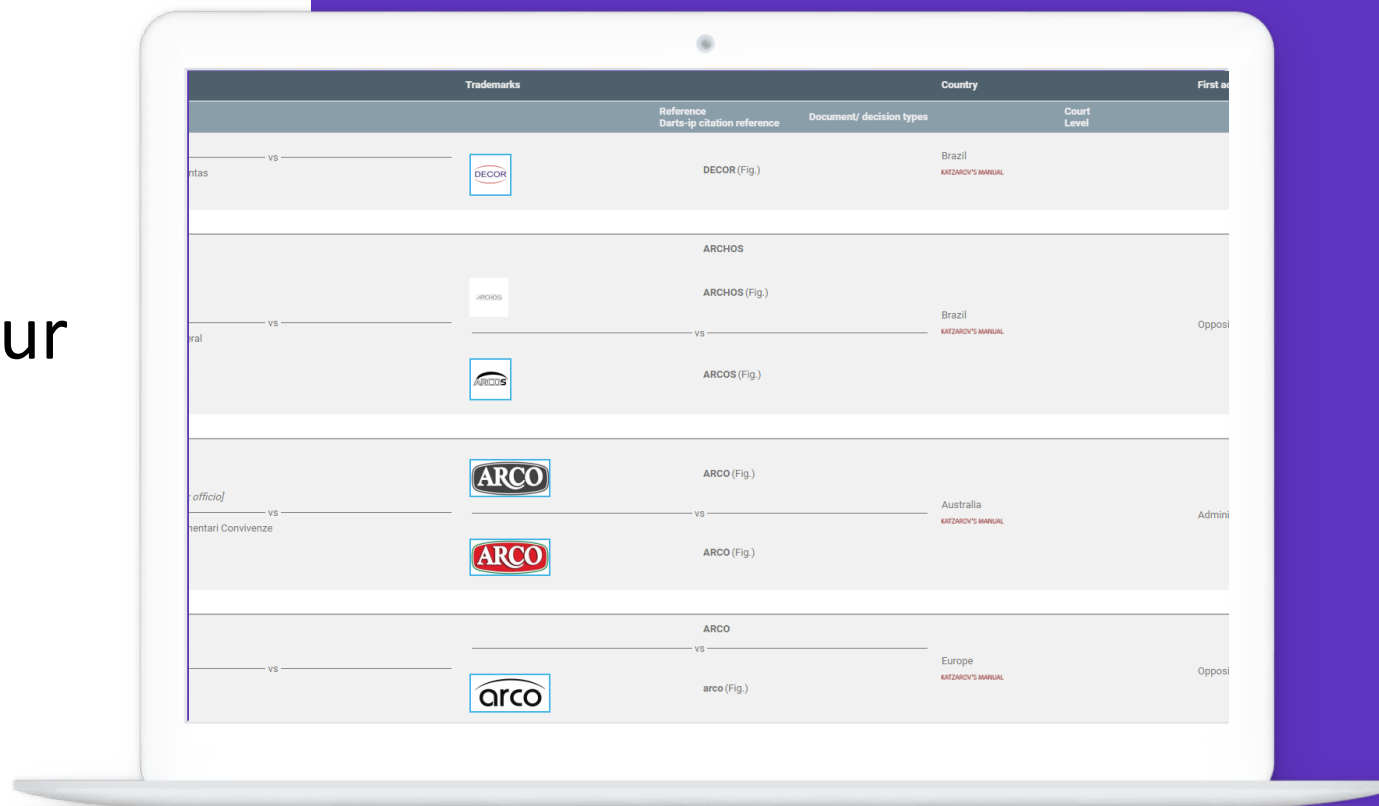

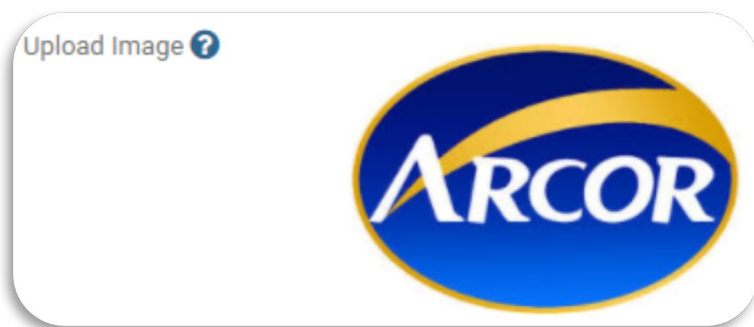

Were the marks "descriptive"?

- Darts-ip has over 400 points of law specific to Brazil

# Image Recognition

Upload an image / logo and find all cases and decisions evolving similar figures on our data platform.

## GLOBAL PATENT FAMILY SEARCH

Search for cases involving a certain patent or any of its worldwide family members.

## DAMAGE SEARCH

Search for decisions based on the amount of damages attributed.

## CLAIM CONSTRUCTION SEARCH

Search for decisions in which a specific term has been defined.

## NPE FILTER

Narrow your results down to only cases involving parties identified as Non-Practicing Entity (NPE) by our proprietary algorithm.

## POINTS OF LAW

Search for decisions containing substantive discussions on specific topics (e.g. patentability requirements, defining the "skilled person", FRAND).

## ACTIVE INGREDIENT SEARCH

With the active ingredient search, find all cases in the world involving patents protecting chemical drugs, biologics (e.g. Trastuzumab, Sofosbuvir), veterinary drugs, or vaccines
